TODD ROWLEY, SPRINT VICE PRESIDENT OF 4G/WIMAX, Keynotes Maryland DC Wireless Association SPRING Event

Wireless Leaders Discuss the Future of 4G/WiMAX at the Baltimore Inner Harbor

BALTIMORE, MD., May 20, 2009 – The Maryland DC Wireless Association ("MDDCWA") welcomed Todd Rowley the leader of Sprint's 4G/WiMAX business unit as keynote speaker for its spring event in Baltimore, Maryland. Mr. Rowley was instrumental in developing Sprint's 4G/WiMAX business plan and the recent Sprint/Clearwire transaction. As vice president of 4G/WiMAX he is responsible for leading Sprint's entire 4G/WiMAX business unit and is a worldwide visionary and thought leader on 4G/WiMAX.

Mr. Rowley stated that, "Sprint continues to lead the wireless industry in innovation via its aggressive expansion of 4G service throughout much of the U.S. this year and beyond for our valued customers." Later, Mr. Rowley provided live demos displaying the power and value of Sprint's 4G capabilities to the audience.

The event attracted leaders from throughout the wireless and business world from Maryland, the District of Columbia, Virginia and beyond. This included representatives from the founding members of the association; Archer, Inc., Atlantic Risk Management, CMX Engineering, Network Building & Consulting, LLC, Site Link Wireless, LLC, and Smartlink, LLC.

The meeting was concluded by remarks by MDDCWA President, David Yacoub, "If the Maryland/DC area is to remain a leader in the wireless industry, this Association has the responsibility to help drive and promote the development of the latest and greatest technological advancements. 4G is certainly such an advancement and I believe I speak for all of us by stating that the capabilities are utterly amazing, especially compared to where we were just ten, five and even last year. 4G is here and it is a very exciting."

About The Maryland DC Wireless Association

Founded in 2007, the Maryland District of Columbia Wireless Association ("MDDCWA") is a non-profit industry organization consisting primarily of individuals and businesses that are involved with the deployment, operation and maintenance of wireless networks. Firms, such as cellular carriers, tower companies, project management consultants, architecture and engineering firms, surveyors, regulatory consultants, general contractors and law firms are represented. The MDDCWA goal is to promote positive wireless industry awareness by cultivating relationships

between industry members and the local communities it serves to ensure that continued advancement of the industry.
